

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

The main objectives of computer engineering technology program are:

1. **Developing Technical Skills:** Equip students and professionals with the technical skills necessary to design, develop, and maintain software and hardware systems.
2. **Application of Knowledge:** Enable the practical application of theoretical knowledge in real-world scenarios, preparing individuals to work in various industries such as IT, telecommunications, finance, healthcare, and more.
3. **Innovation and Creativity:** Encourage innovation and creativity in developing new technologies and improving existing ones.
4. **Ethical and Social Responsibility:** Promote awareness of ethical, legal, and social issues related to the use of technology, ensuring responsible and sustainable practices.
5. **Collaboration and Communication:** Develop strong teamwork and communication skills to work effectively in multidisciplinary teams and convey complex technical information clearly and effectively.
6. **Lifelong Learning:** Instill a commitment to lifelong learning to keep pace with the rapid advancements in technology and continuous professional development.
